

The product shown may differ from standard configuration.

## PRIMO® XXM

Standard Seat with Mechanical Suspension

# PRIMO® XXM

## Technical data

### Standard seat

The Primo XXM has an easy-to-use lever for optimally setting the suspension to the driver's weight within the range between 45 and 170 kg. Especially when a vehicle is used by multiple drivers, it's important for unpracticed users to be able to quickly and intuitively perform this important setting. The extra-high backrest, in conjunction with a lumbar support, bolsters the back and ensures an even more comfortable ride. The Primo XXM is equipped with an operator presence switch as well as a duosensitive ELR-belt system as standard.

Mechanical suspension

Mechanical lumbar support

Manual weight adjustment

### Features

Features	PRIMO® XXM	PRIMO® XXM	PRIMO® XXM
